

NETWORK MONITORING SERVICES

THE MOUNT PLEASANT GROUP IS ONE OF ONTARIO'S OLDEST, LARGEST AND MOST INNOVATIVE CEMETERY AND FUNERAL OPERATIONS.

The Mount Pleasant Group owns and manages 10 cemeteries across the Greater Toronto Area, ranging from Brampton to Oshawa; including, four crematoriums, 14 mausoleums and five visitation centers where funeral services are also provided. In addition, funeral services are also offered through The Simple Alternative Funeral Centers in Toronto, Mississauga and Pickering.

The Mount Pleasant Group complements its IT infrastructure management with Lanworks Monitoring Services to provide a holistic view of its entire network, in depth performance graphs, real time alerting, and on-demand reporting for mission critical software applications and devices.

The benefits to Mount Pleasant Group include;

- Full visibility of critical software applications and networks devices
- Secure portal and web access
- Detailed usage forensics with Netflow
- Proactive notification of applications and systems overload or potential failure
- Reduced downtime and potential business impact with proactive alerts
- Fast and timely response to critical applications
- Effortless installation and maintenance
- Easy to use and low cost services

“Having Lanworks do our monitoring means we have 24x7 notifications if anything is down without the work of configuring, updating and managing monitoring software or the worry that the physical unit running the monitoring goes down first. It lets my staff concentrate on fixing user issues rather than checking if the monitoring is working as it should”. Pim Rom-Colthoff, Director of Information Technology, The Mount Pleasant Group.
